Assessment of students	The assessment of students' knowledge is based on indicators of how well they have mastered the teaching materials during the semester and final assessments (results of tests, assignments, and written and oral work). During the course "Dry Construction Mixtures in Finishing Works", students are assessed on a 100-point scale. Of these, 50 points are allocated to continuous and midterm results (of the 50 points, 60% to continuous assessment and independent study and 40% to midterm assessment), and 50 points to the final assessment. Students whose combined continuous and midterm score is below 30 points are not admitted to the final assessment exam. A student who scores 30 or more points in the final assessment is considered to have mastered the subject.
Examination requirements	The student must have fully mastered the theoretical and practical concepts on the topic and be able to present the results of their analysis correctly. The student must have completed the assignments given in independent work and in the continuous and midterm forms of assessment. In addition, within the set time the student must have earned sufficient points in the continuous, midterm, independent study and final assessments for the subject concerned. A student who has not submitted the continuous assessment, midterm assessment and independent study assignments, or who has scored fewer than 30 points for these assignments and types of assessment, is not admitted to the final assessment. Likewise, a student who has missed 25% or more of the classroom hours allocated to the subject without a valid reason is removed from the subject, is not admitted to the final exam, and is considered not to have earned the corresponding credits for the subject. A student who fails the final exam or scores in the range of "0–29.9" points in this type of exam is considered to have an academic debt.
