MRD — Qualification Discharge Range

4. Basic rules

In HALIKK-2020, employees are divided into 9 main groups (the first number of the code) by employee positions and professions:

1st main group	Legislators, senior officials, managers
2nd main group	Professional experts
3rd main group	The composition of junior specialists and support staff
4th main group	Office workers
5th main group	Trade enterprises and employees of the service sector
6th main group	Qualified employees of agriculture are fishermen, pisciologists
7th main group	Industry, construction skilled workers and related professions
8th main group	Operators and assemblers of industrial equipment and machinery
9th main group	Unskilled staff

When clarifying the types of professional activity and training, each main group is divided into an average group (number 2 of the code). Average groups are 43 in total. Average groups, in turn, are divided into 130 subgroups, and subgroups are divided into 436 initial (base) groups.

All groups have their own name and represent a specific occupation (for example, "Operators servicing equipment for the production of rubber" - code "8141").

Positions (professions) in each primary training group are arranged alphabetically in Russian, taking into account international classifications.

HALIKK-2020 includes:

position (professions) number in ascending order;

names of positions (professions) in Russian;

names of positions (professions) in the state language;

code according to MXSK-08;

the type of personnel (whether it is a worker or an employee);

the name of the employee category;

the range of discharges according to working professions;

the level of the National Qualification Framework of the position (occupation);

level of education.

The table of section 2 has the following form:

Serial number	The name of the position (occupation) is in Russian	The name of the position (occupation) is in Uzbek	Sequence number within the group	Code according to MXSK-08	Servant / Worker	Staff category	Qualification Discharge Range (MRD)	National Qualifications Framework Level (MMR)	Education level code
1	2	3	4	5	6	7	8	9	10

Codes of positions (professions) according to MXSK-08 will consist of 4 numbers:

the first number represents the main group;

the second number represents the average group;

the third number represents the subgroup;

the fourth number represents the initial (base) group.

For example: the position "Genetic" has the code "2131" according to MXSK-08, the numbers in it represent the following:

Number 1	2	Main group: specialists — professionals			
Number 2	2	1	Average group: specialists in the field of physics, mathematics and technical sciences — professionals		
Number 3	2	1	3	Subgroup: computer specialists — professionals	
Number 4	2	1	3	1	Primary group: systems developers and analysts

The categories of employees related to the positions of employees are designated by the following abbreviations:

"B" — management staff;

"I" - production employees;

"M" - experts;

"T" - technical staff;

"X" — service personnel.

Based on the complexity of working professions (without taking into account working conditions) and according to the qualifications required of employees in their performance, the tariff set in the uniform tariff-qualification references or the "network tariff-qualification references" of industries (networks) developed by state and economic management bodies shows the quantities from the lowest (1st grade) to the highest (8th grade).

If the 1st-level job requires the lowest qualification, the 8th-level job is unique, has a special complexity and requires a high level of skill and skill from the employee.

Tariff levels or their range are not specified for some professions, in which case a mark is placed in the corresponding column (graph).

Information field code International Standard Classification of Education (TXSK-2011):

code "2" — training or professional experience in short-term courses or production courses or through the "master-apprentice" method on the basis of an educational organization;

code "3" — initial professional education or secondary special education or short and medium-term certified vocational training courses or professional experience;

code "4" — long-term vocational training courses on the basis of initial professional education and professional experience or secondary professional education or vocational training programs on the basis of educational institutions or validated vocational training programs with a duration of not less than 1 year;

code "5" — secondary professional education and professional experience or secondary special professional education;

code "6" — bachelor's degree or, in some cases, secondary special professional education and professional experience;

code "7" — master's degree, internship, internship (on the basis of a mastered bachelor's program) or additional professional education (specialization) or higher level additional education (business management, public management and other international recognized post-secondary education);

In this case, code "2" and "1" do not require short-term training, including ("2") - in production and ("1") - professional training.

Some positions of servants may belong to management and production staff according to the functions performed.

When determining the standard number of technical and service personnel in state and economic management bodies, some positions and professions of technical and service personnel may be included in the list of production employees, if these positions and professions are included in the structure of the production units of the said state and economic management body.

Certain positions of employees and professions of workers not specified in HALIKK-2020 may be established:

a) by derivative positions and professions, including the professions of workers: 1) senior; 2) assistant; 3) belonging to the first, second or third class;

b) according to the positions of employees: 1) vice; 2) first deputy; 3) deputy; 4) head; 5) leader; 6) large; 7) small; 8) shift; 9) first; 10) second; 11) third; 12) fourth; 13) manager and specialist assistant; 14) senior assistant; 15) first assistant; 16) second assistant; 17) shift assistant; 18) group; 19) brigade; 20) district (district); 21) plot; mining and others.

When determining the resulting position (occupation), the level of independence of employees in performing their duties, their responsibility for the correctness of decisions, initiative, efficiency and quality of their work, as well as practical experience are taken into account.

The resulting positions and professions include the positions and professions created by clarifying the characteristics of the content of activities for the positions and professions specified in HALIKK-2020. In this case, the position (occupation) indicated in the HALIKK-2020, on the basis of which this derived position (occupation) was created, is considered an object of classification;

c) qualification categories of the position: higher, first, second, third.

As a rule, qualification categories for the positions of employees are determined based on the results of attestation conducted in accordance with the procedure established by law;

g) class and class levels.

According to them, the list of positions for which classification and class levels are determined, as well as the procedure for their designation, are determined in legislative documents.

The "Name of the position, names of the professions" column shows the repeated (equivalent) name of employees for certain positions and professions.

In this case, the correct name of the position is considered both the main and repeated (equivalent) name when drawing up labor contracts and staff tables of organizations, entering entries into the labor notebooks of employees, issuing orders on labor relations, including positions and employees in the appropriate categories, and determining the right to pension benefits.

If, in accordance with the legislative documents adopted by the state and economic management bodies for certain labor professions, the grades of the jobs used in enterprises are set higher than those indicated in the "MRD" column of the table, the ranges of the qualification grades of the labor professions previously established shall be preserved.

Касбий фаолият ва машғулот турларини аниқлаштиришда ҳар бир асосий гуруҳ ўртача гуруҳга бўлинади (коднинг 2-рақами). Ўртача гуруҳлар жами 43 тани ташкил этади. Ўртача гуруҳлар эса, ўз навбатида 130 та кичик гуруҳларга, кичик гуруҳлар эса 436 та бошланғич (базавий) гуруҳларга бўлинади.

Барча гуруҳлар ўз номига эга бўлиб, аниқ машғулотни ифодалайди, (масалан, «Резина ишлаб чиқариш бўйича қурилмаларга хизмат кўрсатувчи операторлар» — коди «8141»).

Ҳар бир бошланғич машғулот гуруҳидаги лавозим (касб)лар халқаро классификаторларни инобатга олган ҳолда рус тилида алфавит тартибида жойлаштирилган.

ХАЛИКК-2020 қуйидагиларни ўз ичига олади:

лавозим (касб)ларниинг ўсиб борувчи тартиб рақамини;

лавозим (касб)ларнинг рус тилидаги номларини;

лавозим (касб)ларнинг давлат тилидаги номларини;

МХСК-08 бўйича кодни;

персонал турини (ишчи ёки хизматчи эканлиги);

ходим тоифасининг номини;

ишчи касблари бўйича разрядлар диапазонини;

лавозим (касб)нинг Миллий малака рамкаси даражасини;

таълим даражасини.

2-бўлимнинг жадвали қуйидаги шаклга эга:

1	2	3	4	5	6	7	8	9	10

Лавозим (касб)ларнинг МХСК-08 бўйича кодлари 4 та рақамдан иборат бўлади:

биринчи рақам ўзида асосий гуруҳни ифодалайди;

иккинчи рақам ўртача гуруҳни ифодалайди;

учинчи рақам кичик гуруҳни ифодалайди;

тўртинчи рақам бошланғич (базавий) гуруҳни ифодалайди.

Ишчи касбларнинг (меҳнат шароитларини инобатга олмаган ҳолда) мураккаблигидан келиб чиқиб, уларни бажаришда ходимлардан талаб этиладиган малакага кўра, ягона тариф-малака маълумотномалари ёки давлат ва хўжалик бошқаруви органлари томонидан ишлаб чиқилган соҳа (тармоқ)ларнинг «тармоқ тариф-малака маълумотномалари»да белгиланган тариф разрядларининг энг пастги (1-разряд)дан энг юқориси (8-разряд)гача бўлган миқдорларни кўрсатади.

1-разрядли иш энг паст малакани талаб этса, 8-разрядли иш ноёб, алоҳида мураккабликка эга бўлиб, ходимдан юқори малака ва маҳорат талаб этади.

Айрим касблар бўйича тариф разрядлари ёки уларнинг диапазони белгиланмайди, у ҳолда тегишли устунда (графада) белгиси қўйилади.
